SIRT1 in Diabetic Nephropathy

Chuan-Ming Hao

Division of Nephrology Huashan Hospital

Institute of Kidney Disease

Fudan University

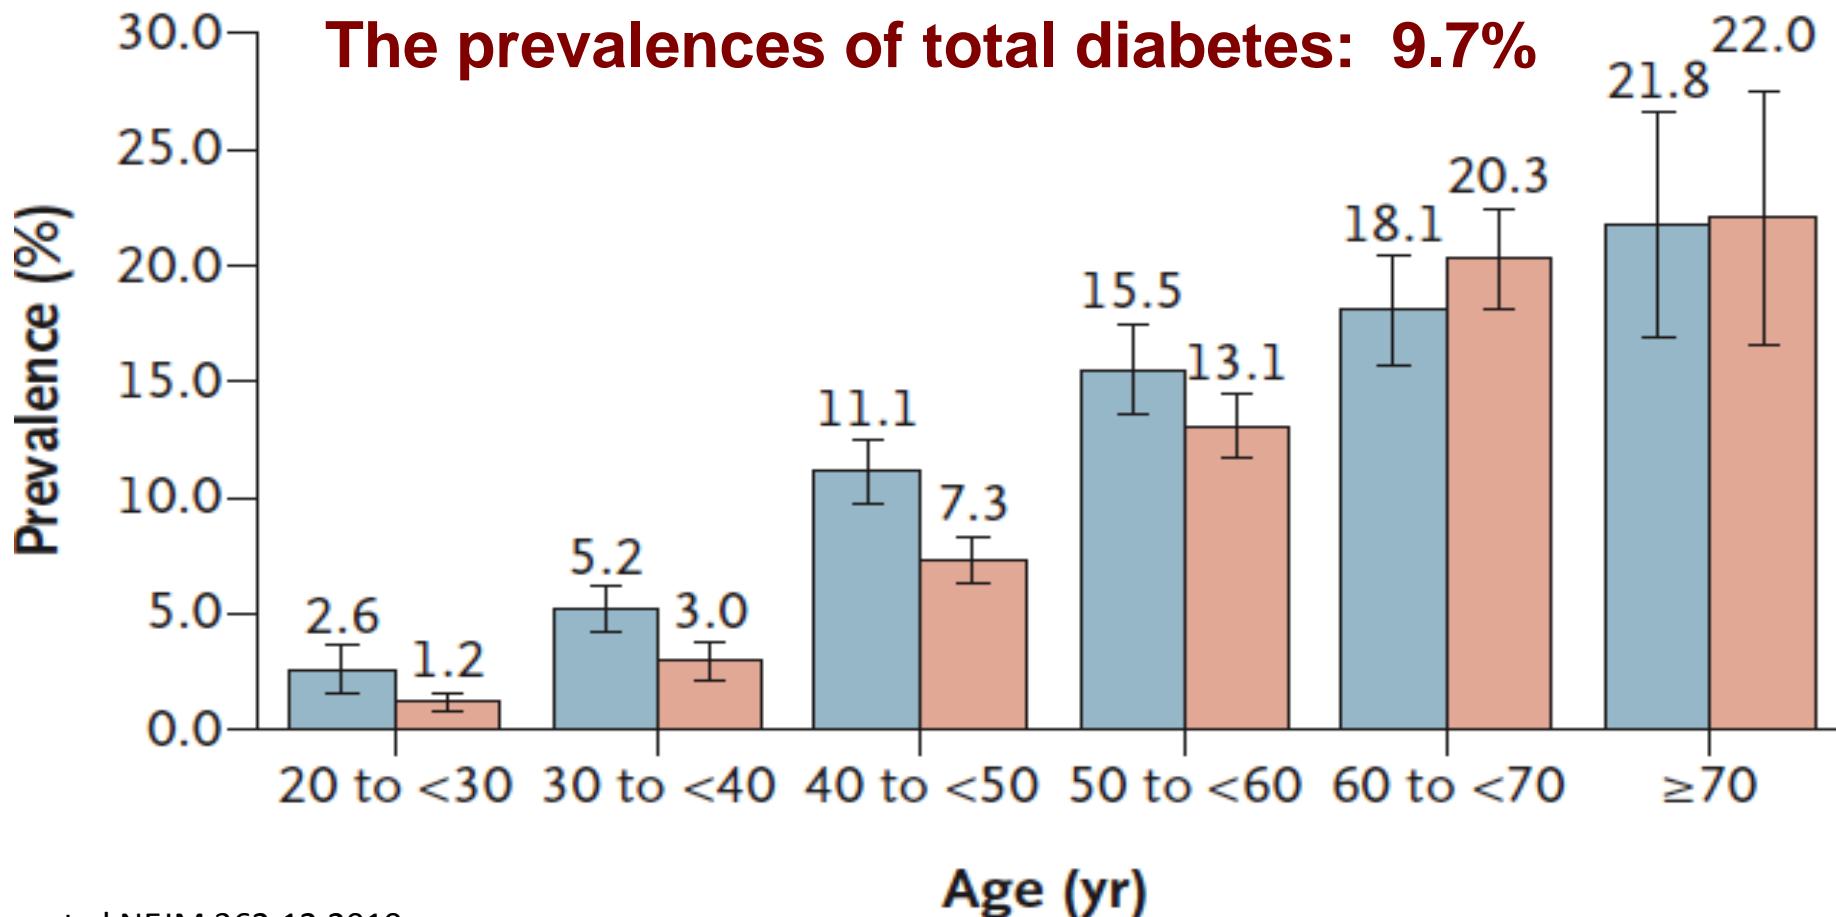

Shanghai, China

Content

- Diabetic nephropathy, a growing challenge in China
- Diabetic Nephropathy is a Prototypical Disease of Gene and Environmental Interactions
- New therapeutic target for diabetic nephropathy -- Role of SIRT1?

Prevalence of Diabetes in China

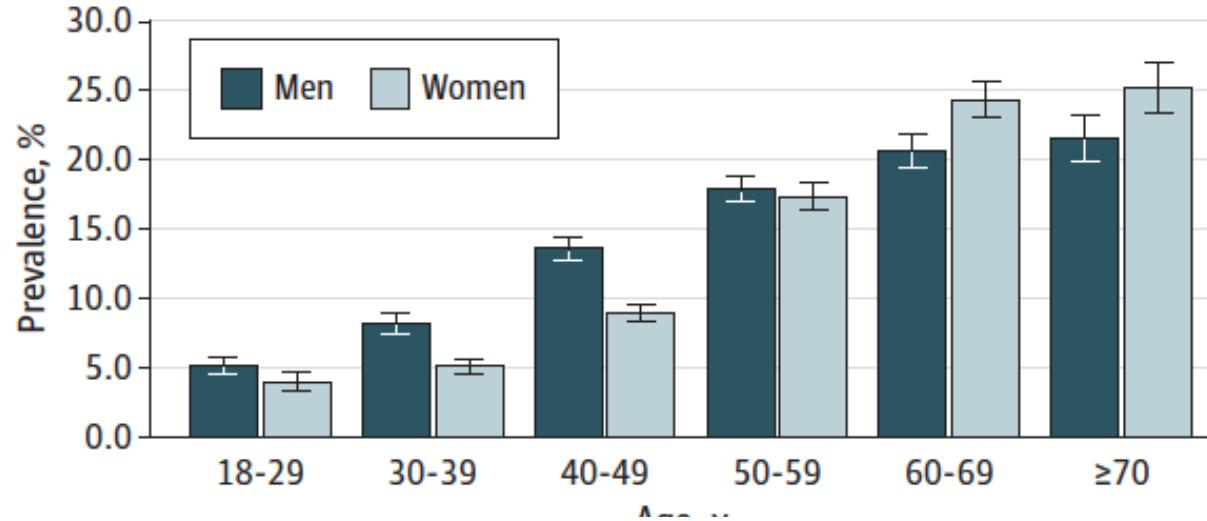

Total Diabetes

Prevalence of Diabetes in China

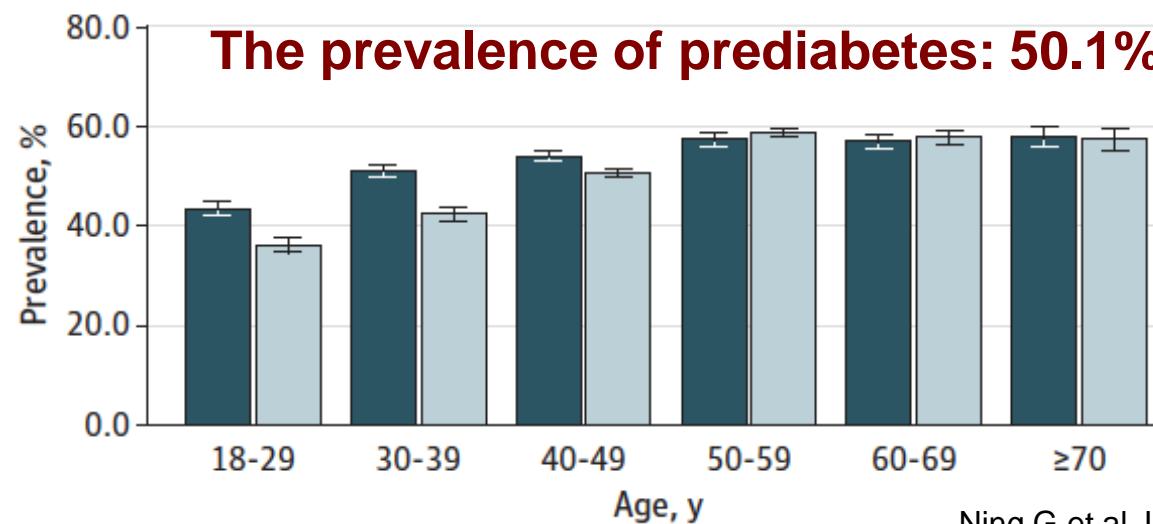

A Diabetes

The overall prevalence of diabetes: 11.6%

B Prediabetes

The prevalence of prediabetes: 50.1%

Causes for ESRD in China

Data from Dialysis Registry of China

Causes	Prevalence				Incidence			
	2011	2012	2013	2014	2011	2012	2013	2014
Primary GN	59.47%	58.16%	55.65%	55.13%	54.28%	51.25%	46.50%	43.93%
Diabetic Nephropathy	15.08%	16.46%	17.83%	16.69%	18.04%	18.89%	20.82%	21.00%
Hypertensive	9.91%	10.07%	9.72%	9.58%	9.52%	9.43%	8.38%	8.71%
PKD	3.32%	3.31%	3.27%	1.53%	2.79%	2.45%	2.51%	1.33%
Kidney stone	2.17%	1.95%	1.87%	3.15%	2.53%	2.13%	2.00%	2.44%
Others	9.46%	8.58%	8.24%	8.52%	11.95%	12.11%	11.57%	11.27%
Unknown	0.59%	1.47%	3.43%	5.41%	0.88%	3.74%	8.21%	11.33%

Management of Diabetic Kidney Disease

- Behavioral therapy
 - Diet, exercise, and smoking cessation
- Pharmacologic intervention
 - Blood pressure
 - Blood sugar
 - Blood lipids
 - RAS blockade

Gaede et al Lancet 1999; 353:617

Phase III trials for DN: A Barren Landscape

1	Recruiting	Evaluation of the Effects of Canagliflozin on Renal and Cardiovascular Outcomes in Participants With Diabetic Nephropathy Conditions: Diabetes Mellitus, Type 2; Diabetic Nephropathies Interventions: Drug: Canagliflozin; Drug: Placebo
2	Recruiting	Pyridorin in Diabetic Nephropathy Conditions: Diabetic Nephropathy; Diabetic Kidney Disease Interventions: Drug: Pyridorin; Drug: Placebo
3	Recruiting	Study Of Diabetic Nephropathy With Atrasentan Condition: Diabetic Nephropathy Interventions: Drug: Atrasentan; Drug: Placebo
4	Completed	Go Fish: Omega-3 Fatty Acid Supplementation in Diabetes-Related Kidney Disease Condition: Diabetes Intervention: Dietary Supplement: Lovaza (fish oil)
5	Terminated	Bardoxolone Methyl Evaluation in Patients With Chronic Kidney Disease and Type 2 Diabetes Conditions: Renal Insufficiency, Chronic; Diabetes Mellitus, Type 2 Interventions: Drug: Placebo; Drug: Bardoxolone Methyl: 20 mg
6	Not yet recruiting	A Trial in Adults With Type 1 Diabetes Mellitus Evaluating the Effects of Fenofibrate Versus Placebo on Macular Thickness and Volume Conditions: Type 1 Diabetes Mellitus; Retinopathy; Diabetic Nephropathy Interventions: Drug: Fenofibrate; Drug: Inert lactose placebo
7	Completed	Vitamin-D Receptor Activation (VDRA) in Chronic Kidney Disease Condition: Chronic Kidney Disease Intervention: Drug: Zemplar

Phase II: Few Proof of Concept Clinical Trials For Diabetic nephropathy

Disease State Search Term	Number of Active Phase II Trials*
Breast Cancer	206
Lung Cancer	167
Diabetes Mellitus	108
Congestive Heart Failure	51
Glioblastoma	50
Stroke	46
AIDS	46
Rheumatoid Arthritis	40
Colon Cancer	24
Influenza	17
Psoriasis	15
Glaucoma	15
Cirrhosis	14
Diabetic Nephropathy	9

Diabetic Nephropathy is a Prototypical Disease of Gene and Environmental Interactions

- Calorie excess is associated with type II diabetes
- Even in the setting of poor glycemic control, patients with diabetes will not always develop clinically evident DKD
- Familial aggregation of patients with diabetic renal disease

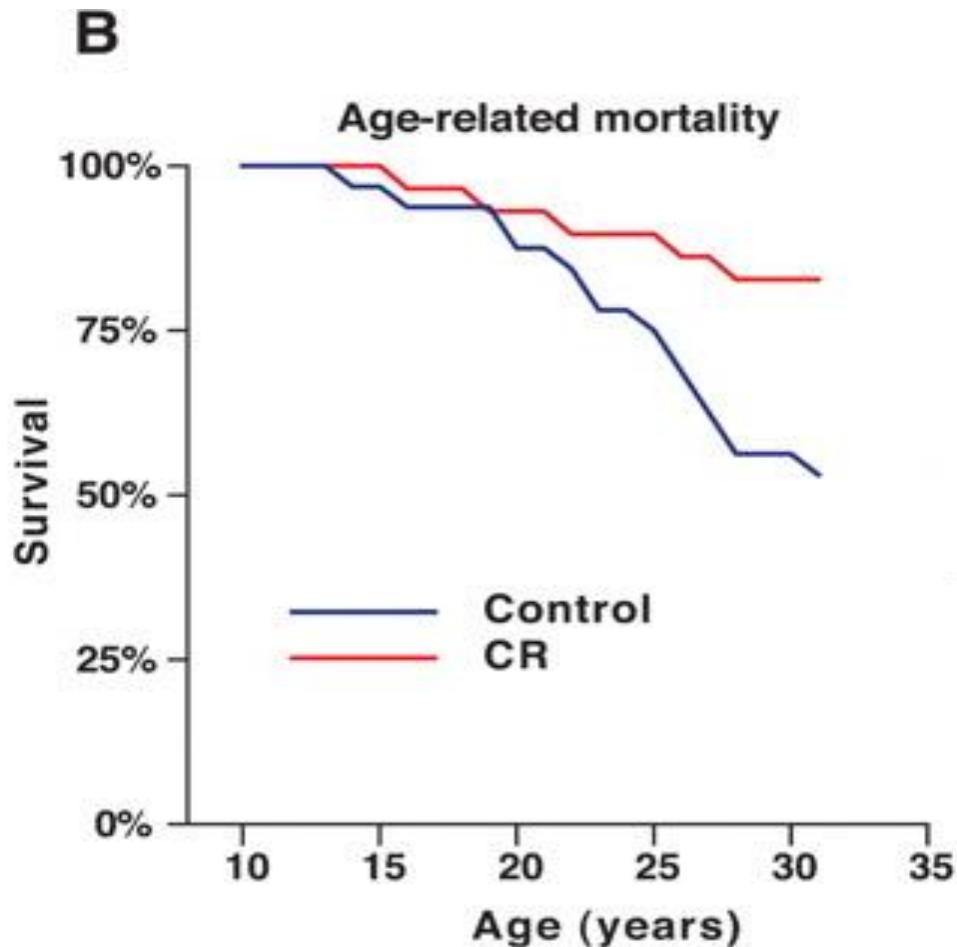

Diabetic Nephropathy is a Prototypical Disease of Gene and Environmental Interactions

- Calorie excess is associated with type II diabetes
- Even in the setting of poor glycemic control, patients with diabetes will not always develop clinically evident DKD
- Familial aggregation of patients with diabetic renal disease

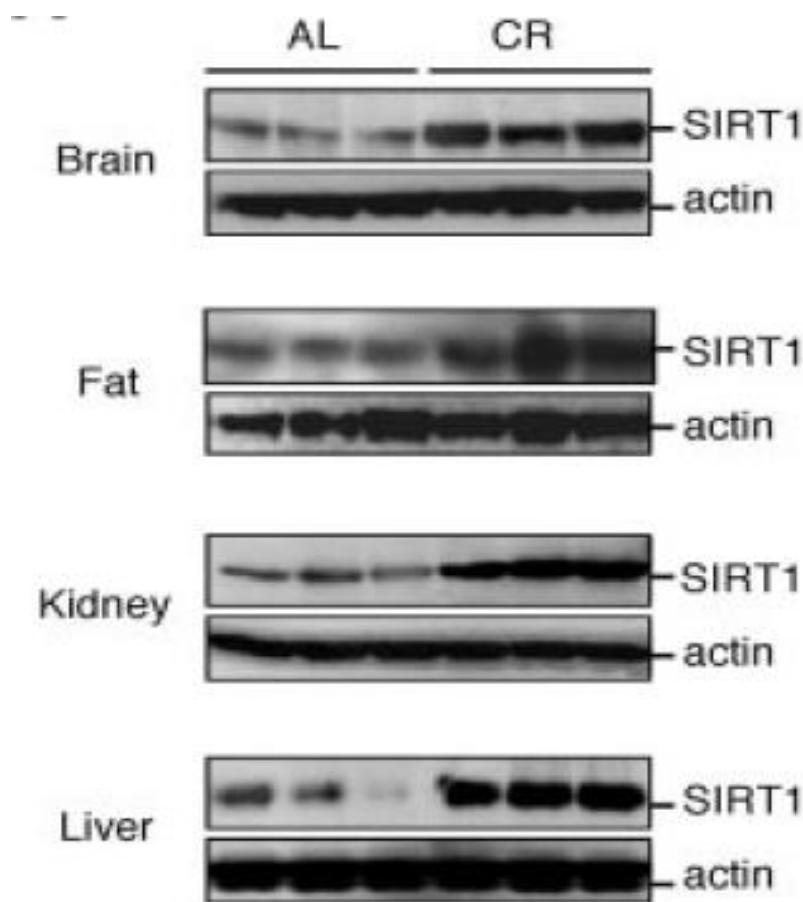

Diabetic Nephropathy is a Prototypical Disease of Gene and Environmental Interactions

- Calorie excess is associated with type II diabetes
- Even in the setting of poor glycemic control, patients with diabetes will not always develop clinically evident DKD
- Familial aggregation of patients with diabetic renal disease

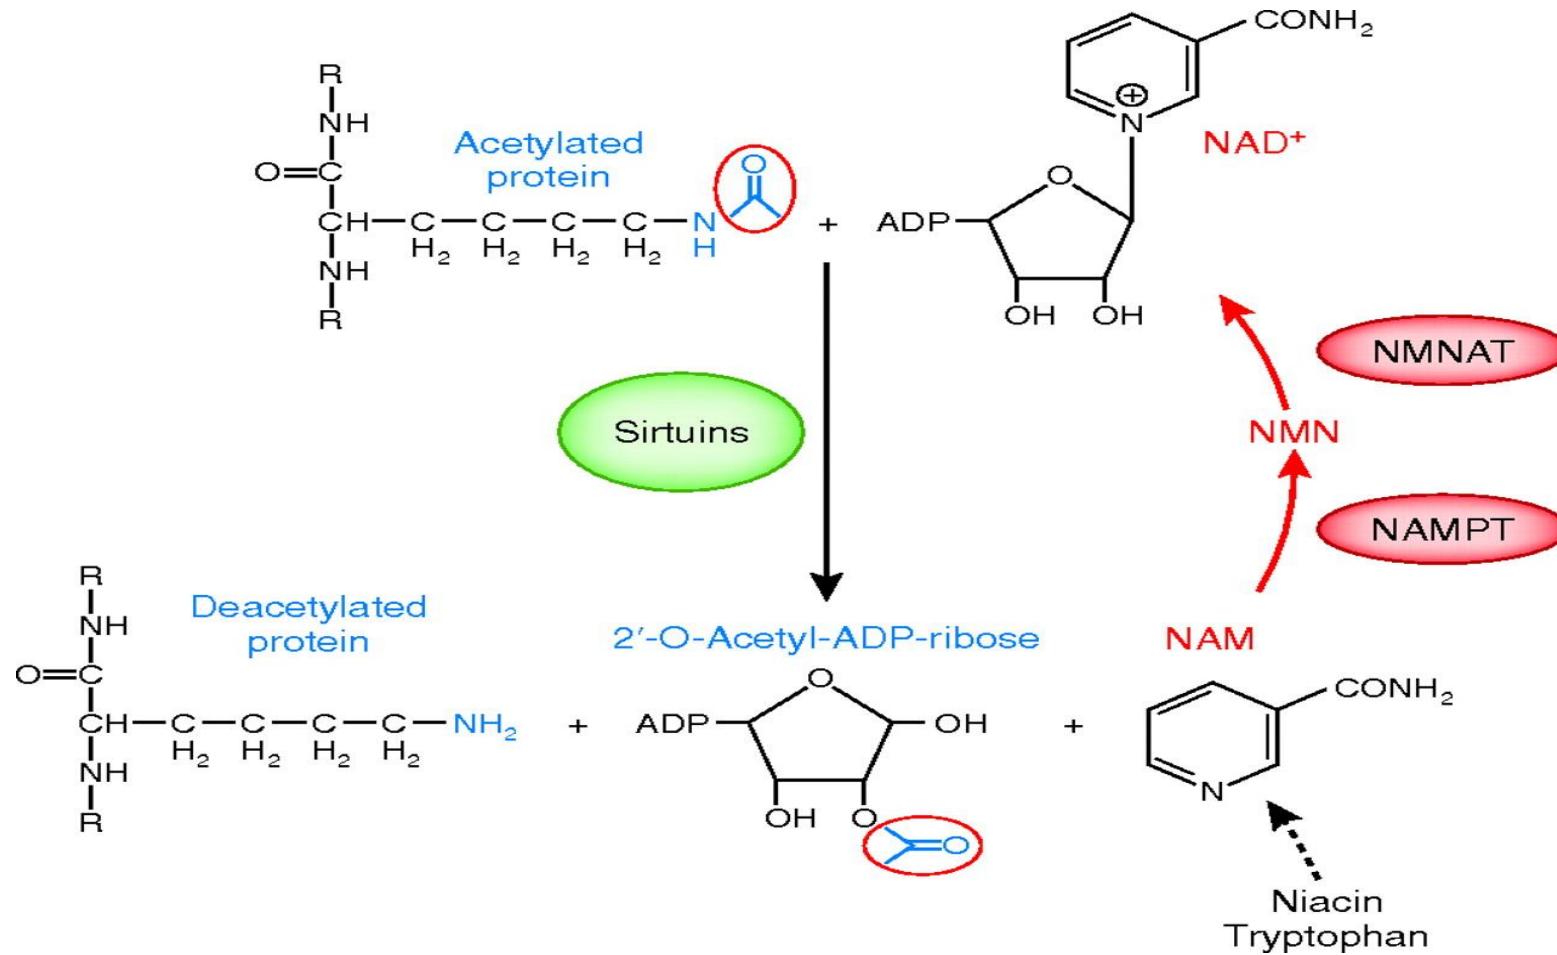

Calorie Restriction Reduces Mortality

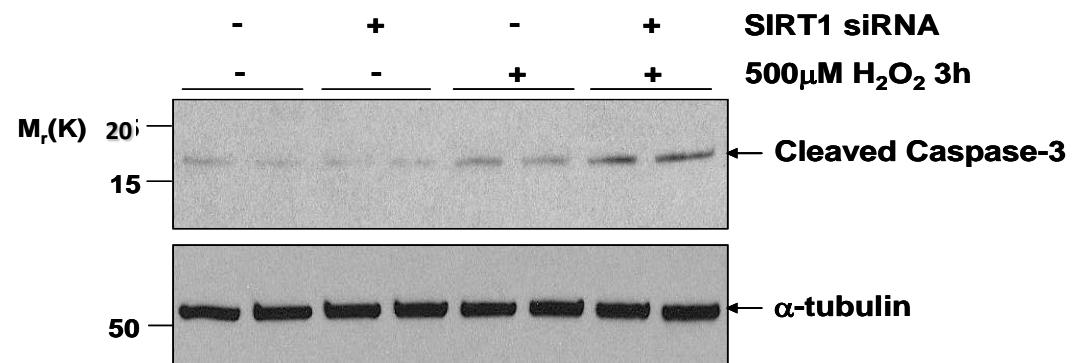

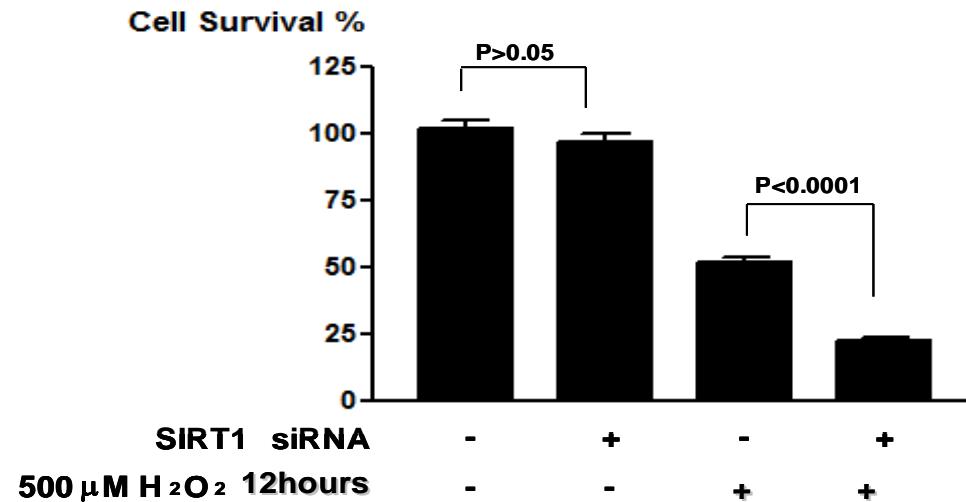

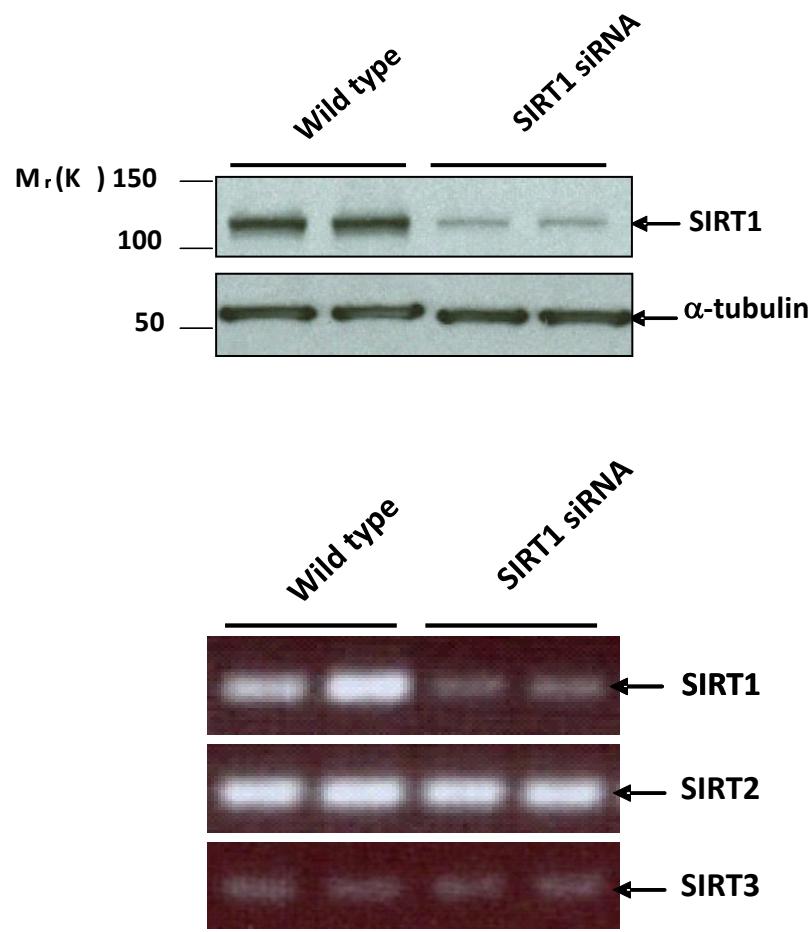

Calorie restriction increases Sirt1 expression

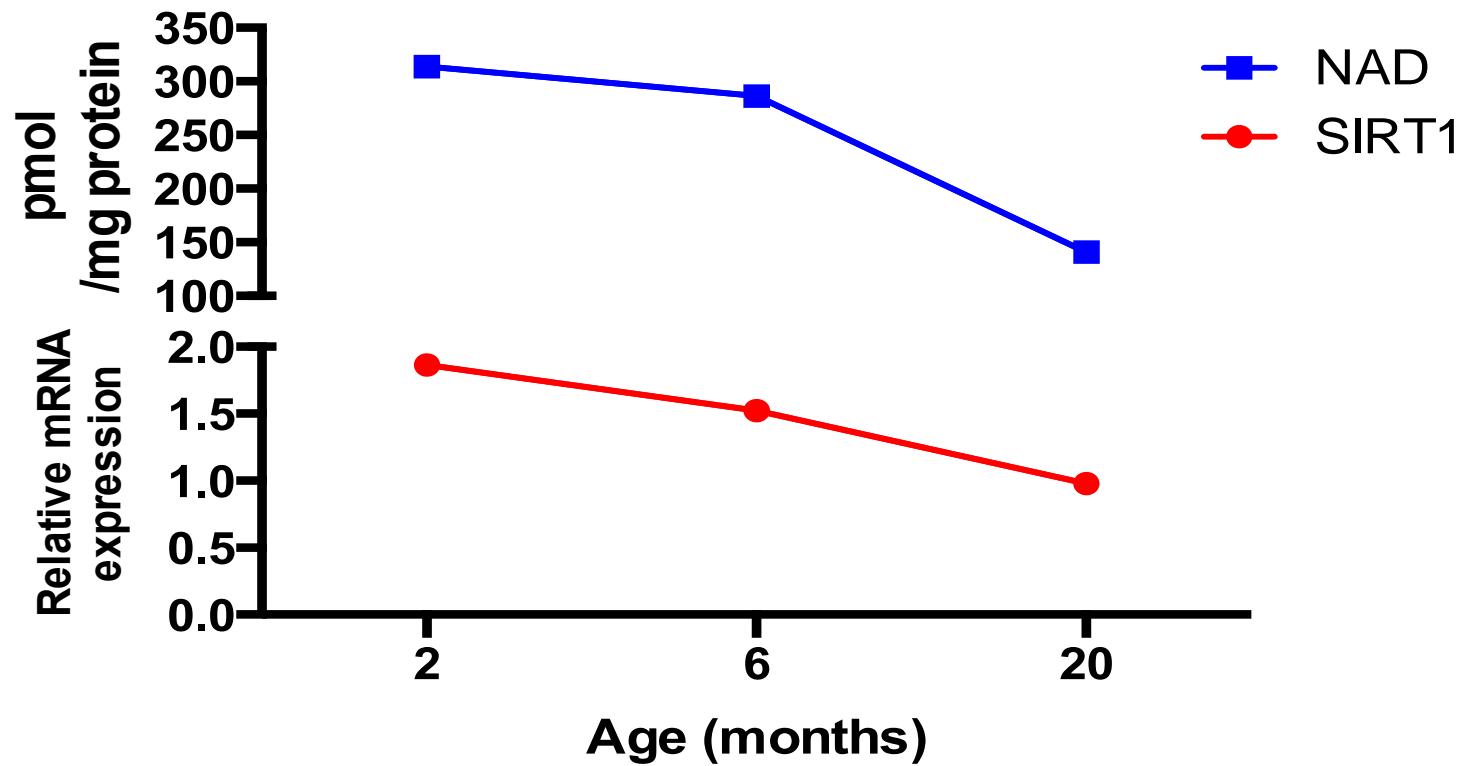

SIRT1

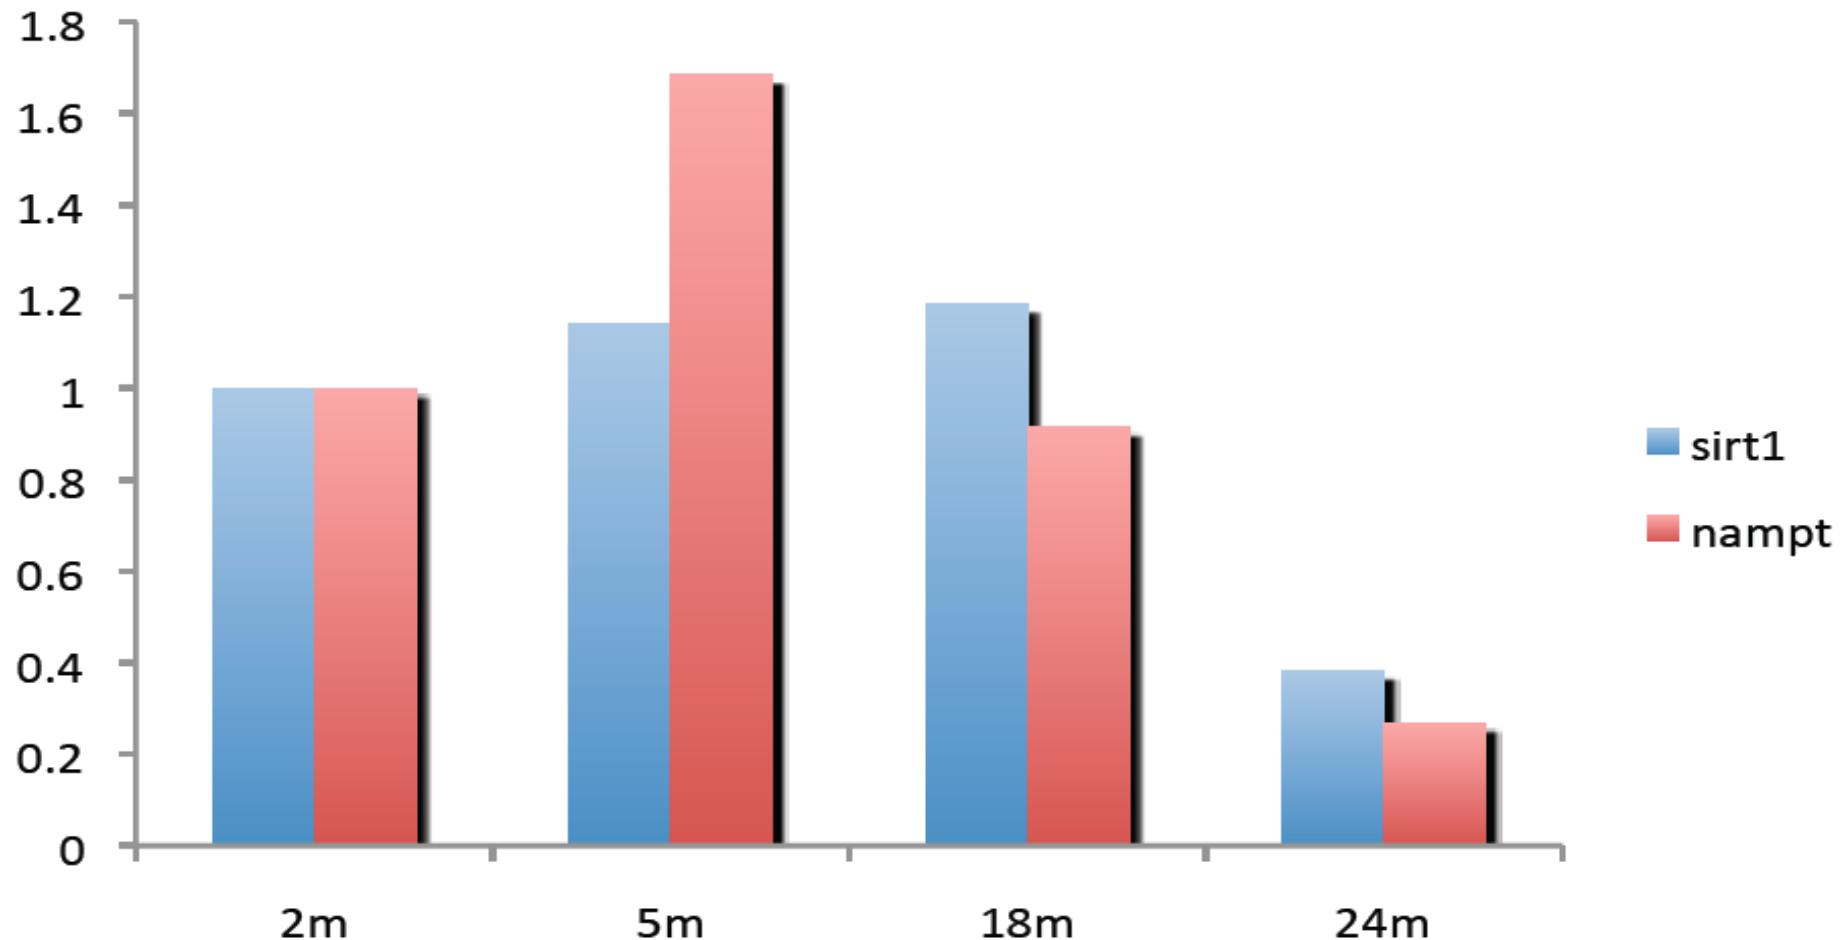

SIRT1-deficient Renal Medullary Interstitial Cells Exhibit Increased Cell Death following H₂O₂

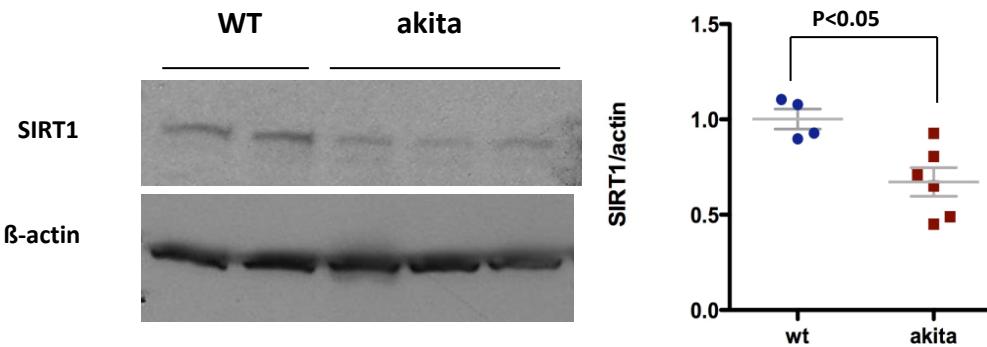

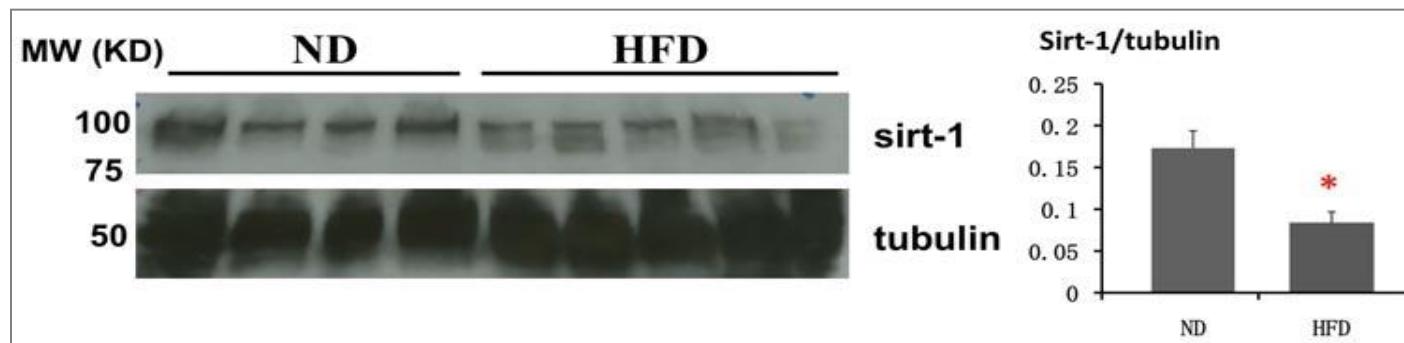

SIRT1 IS NAD⁺ DEPENDENT STRESS RESPONSIVE

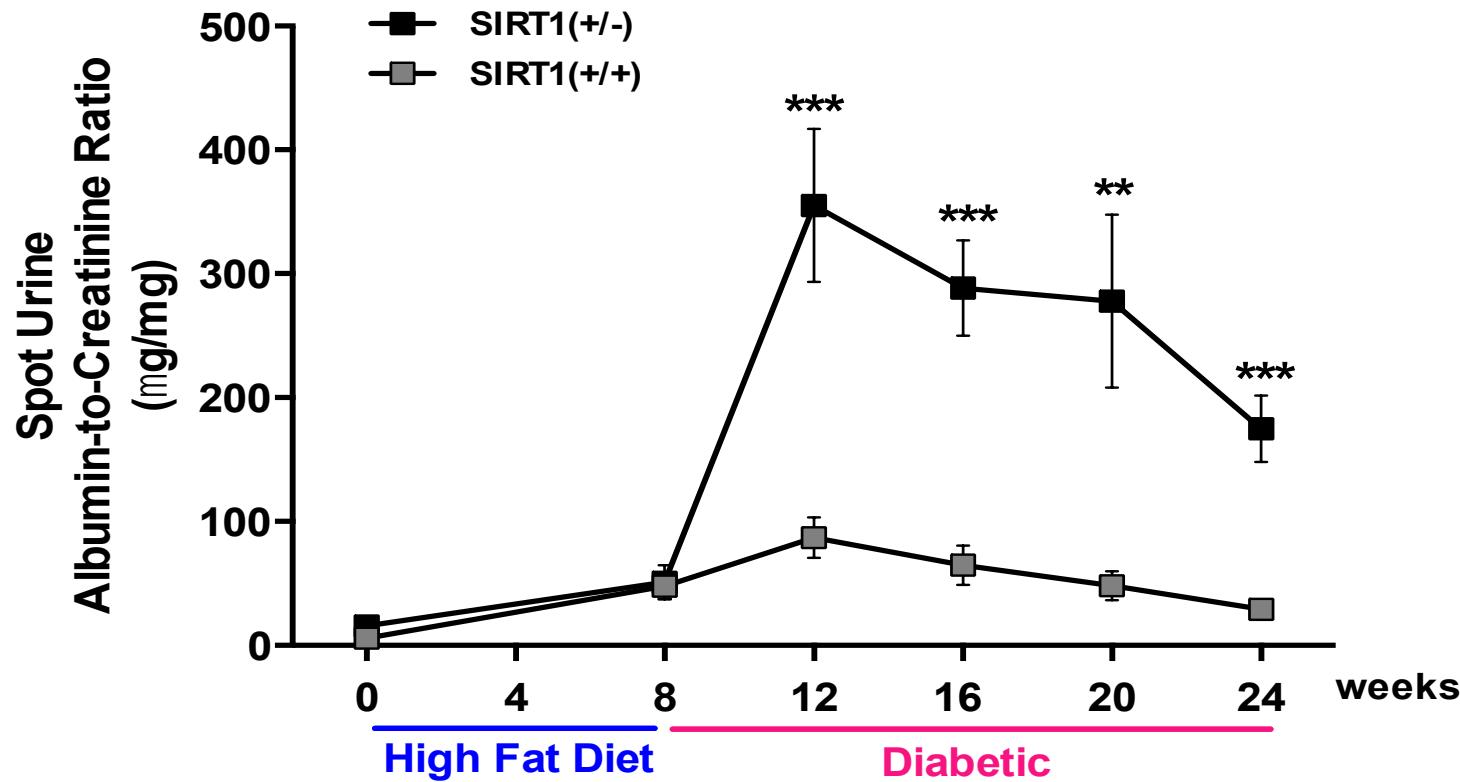

SIRT1 Expression in Aged Mouse Kidney

Sirt1 Expression is Reduced in Diabetic Kidneys

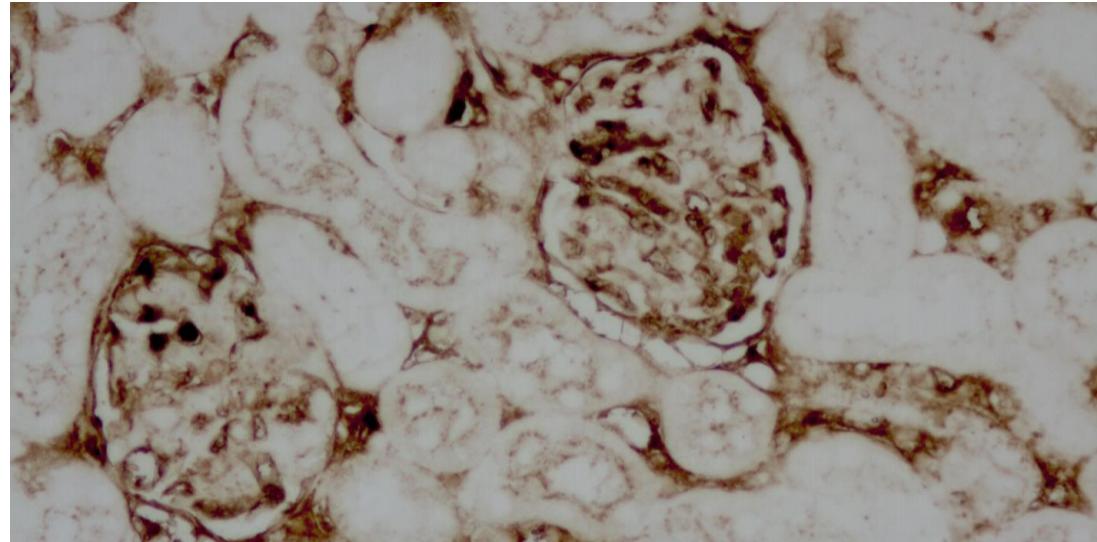

SIRT1 Deficiency Increases Urine ACR in Diabetic Mouse

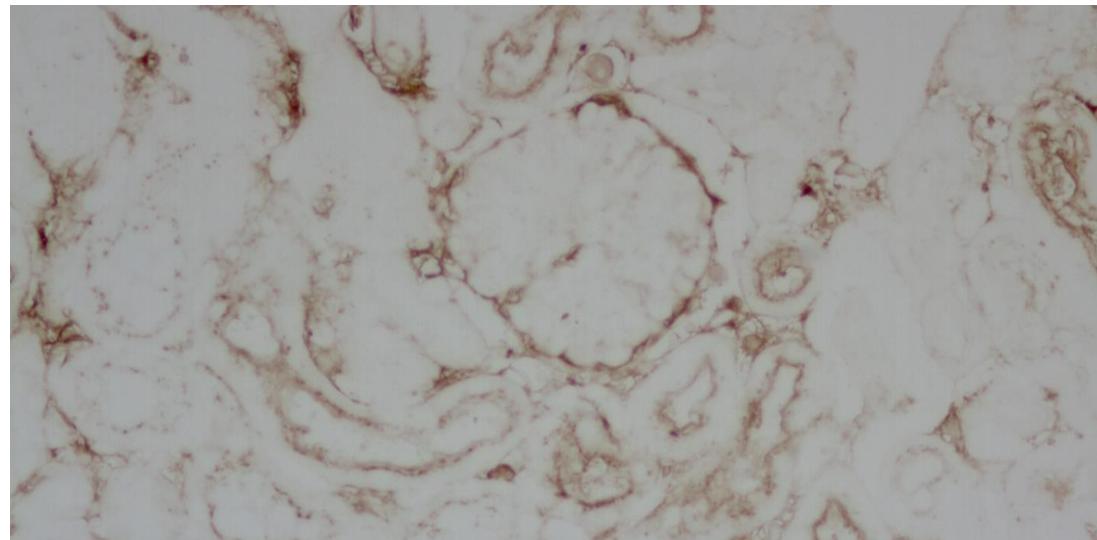

Signs of Renal Fibrosis in Diabetic SIRT1 Deficient Mice

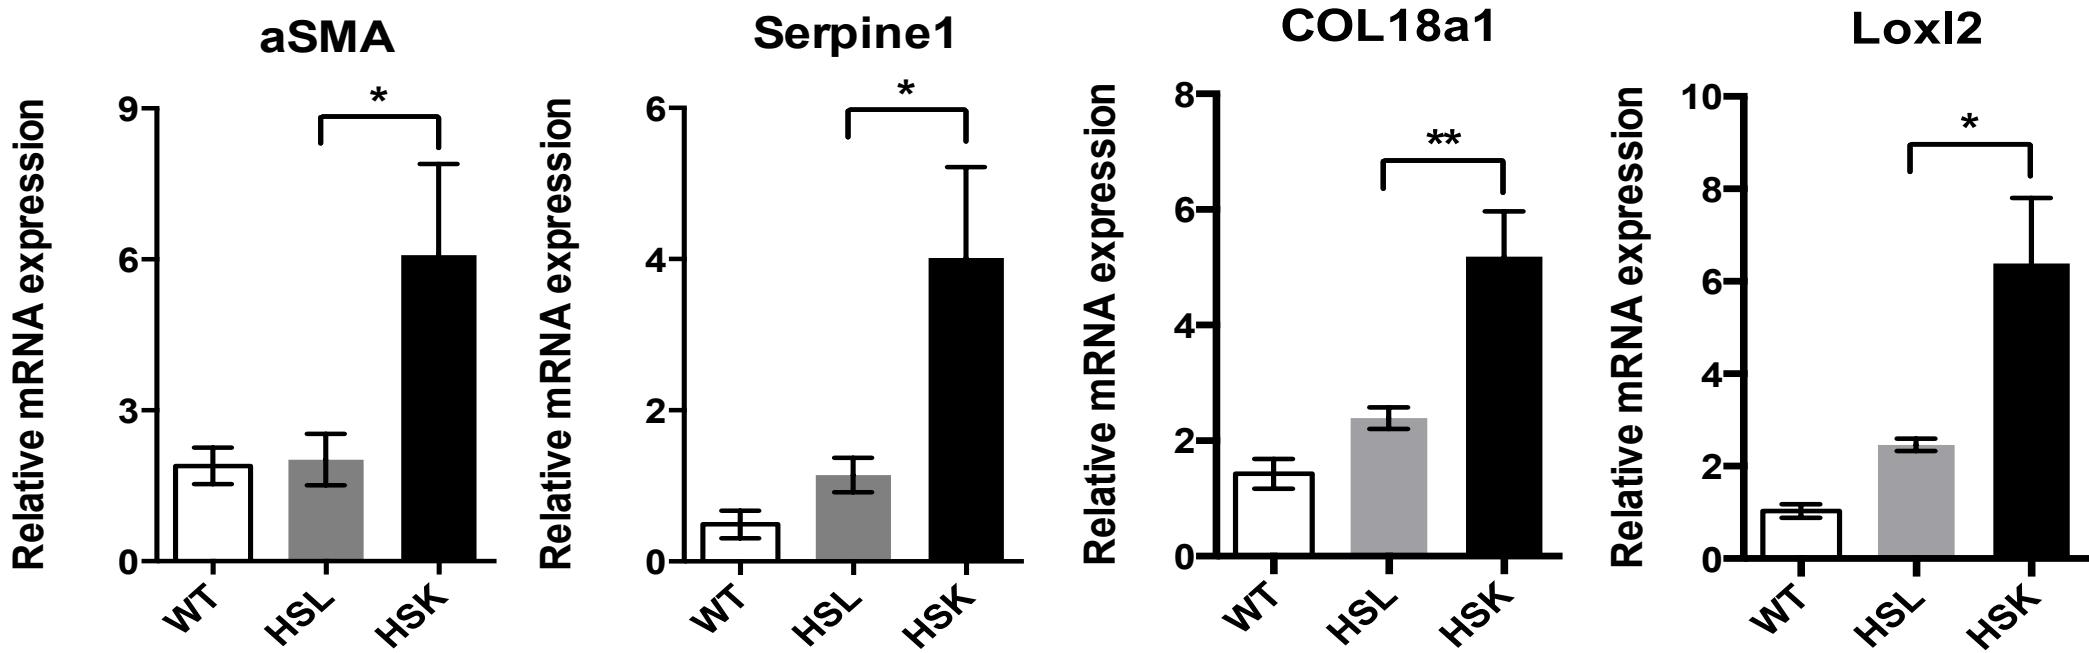

IHC of COL IV
SIRT1(+/-)
*400

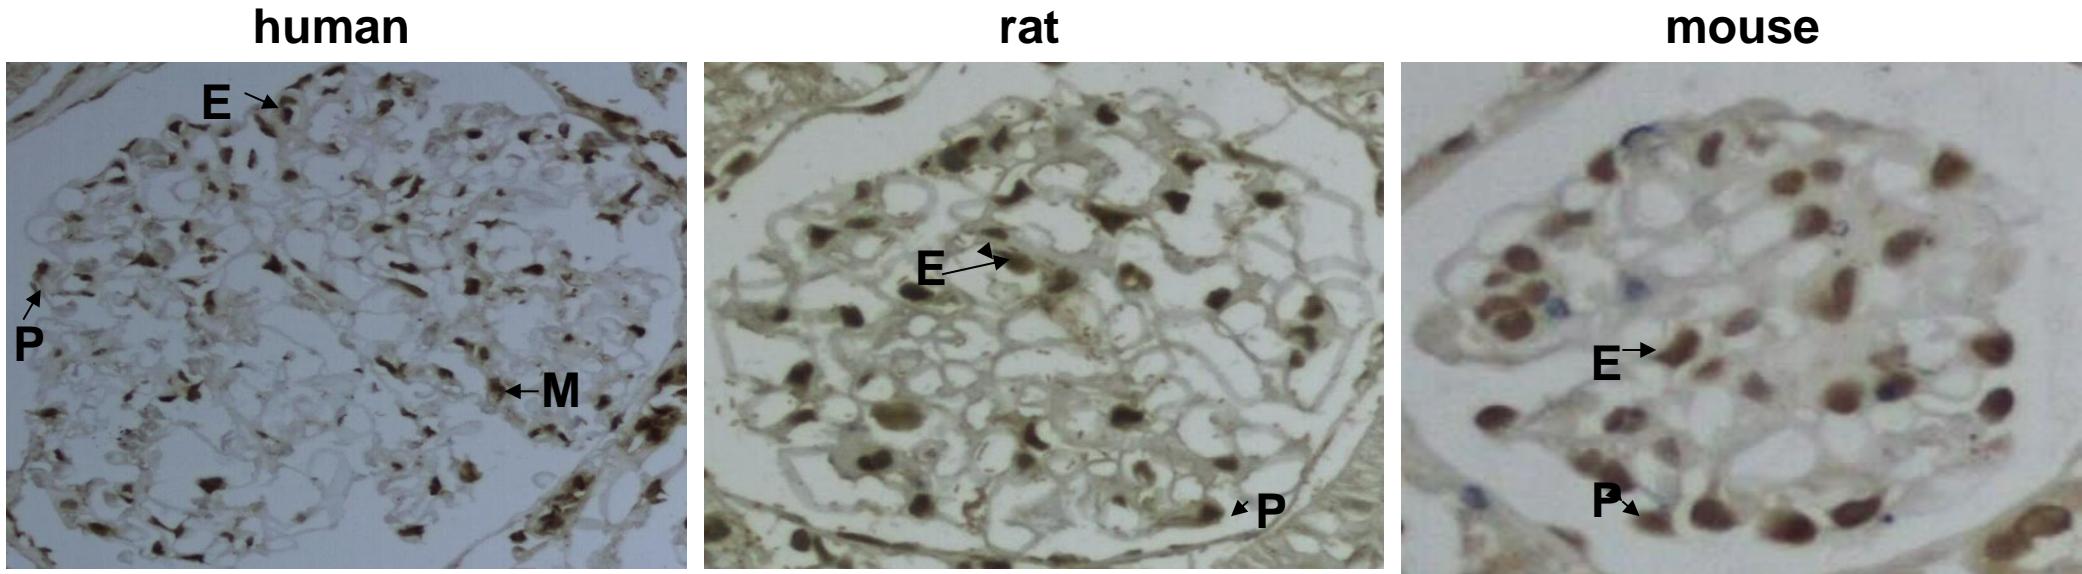

IHC of COL IV
SIRT1(+/+)
*400

Renal Fibrosis in Diabetic SIRT1 Deficient Mice

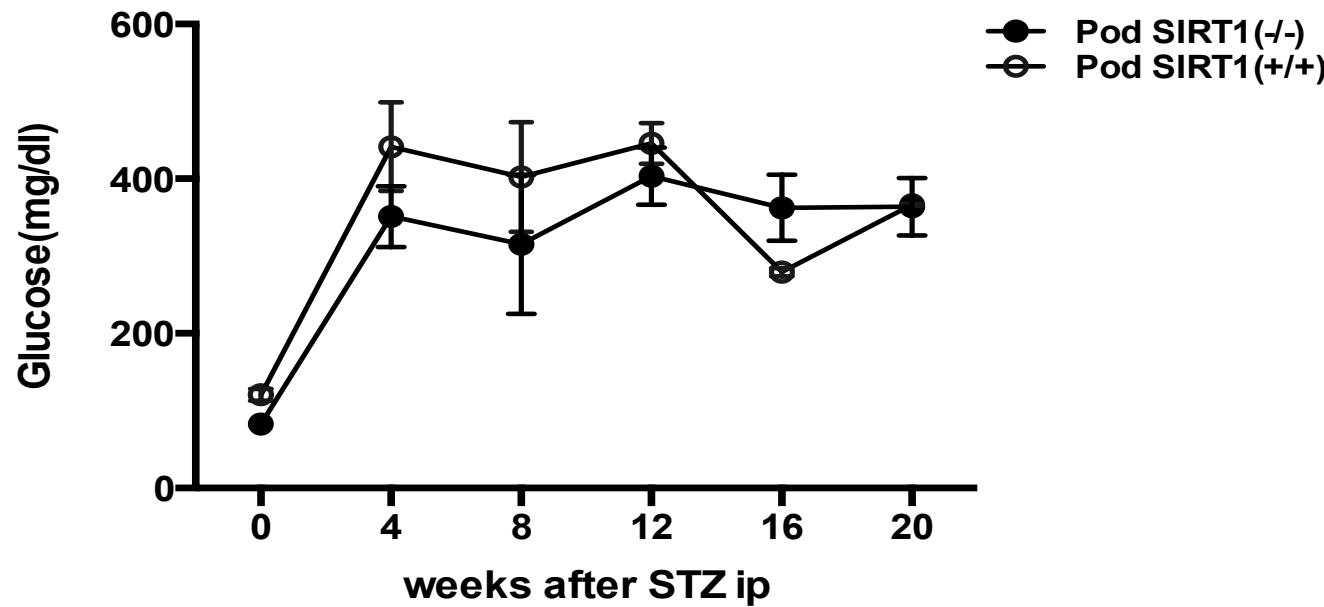

SIRT1 Expression in Glomerular Podocytes and Endothelial Cells

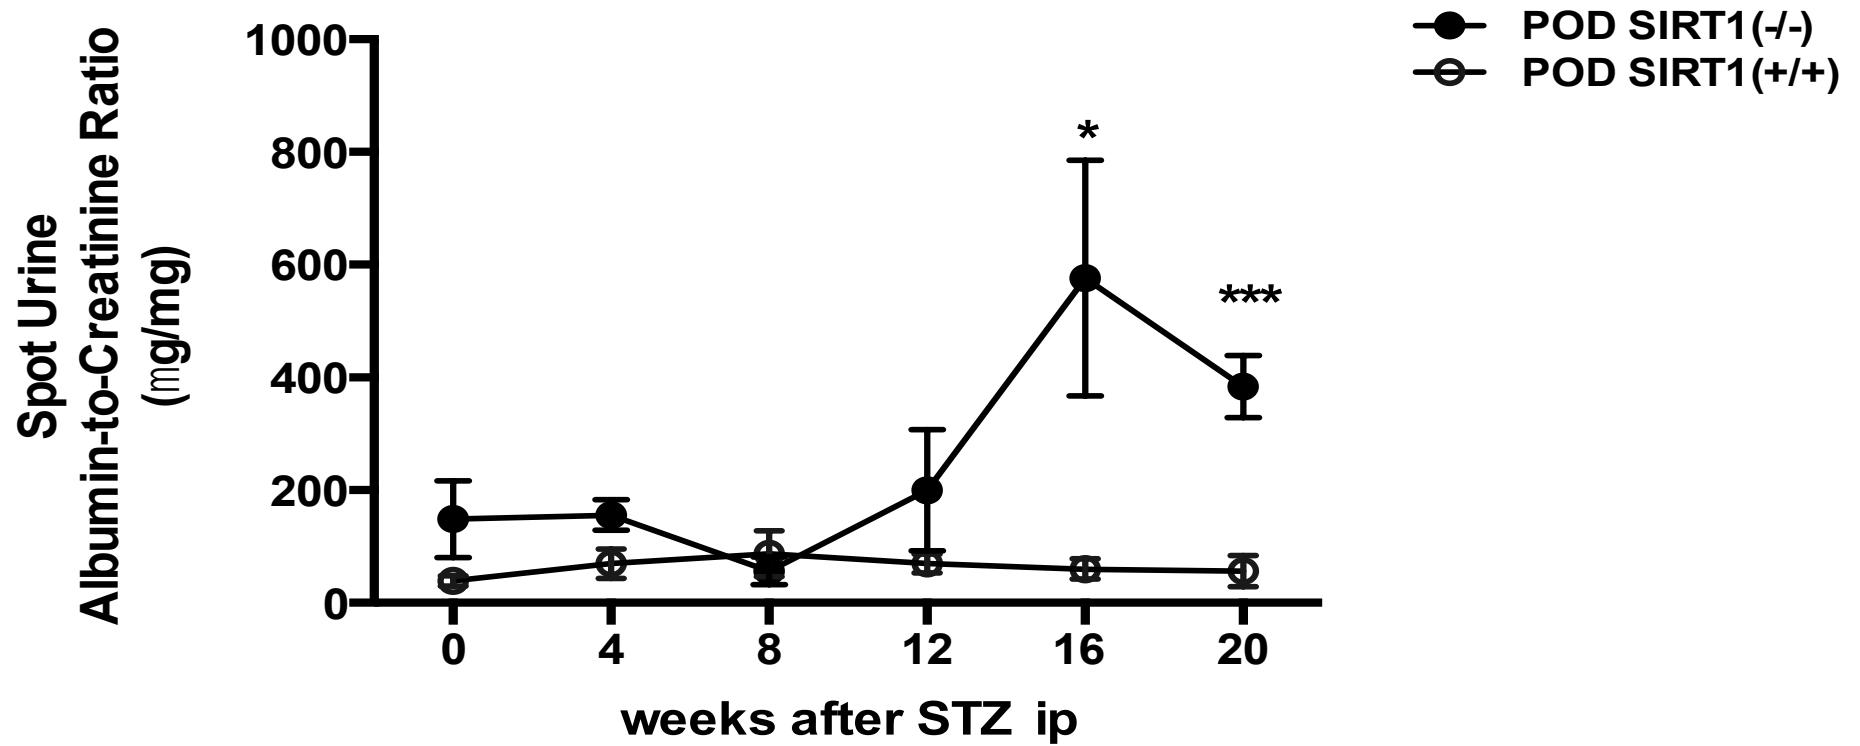

STZ induced Diabetes in Podocyte SIRT1 Knockout Mice

Podocin-Cre mice from JAX lab B6.Cg-Tg(NPHS2-cre)295Lbh/J

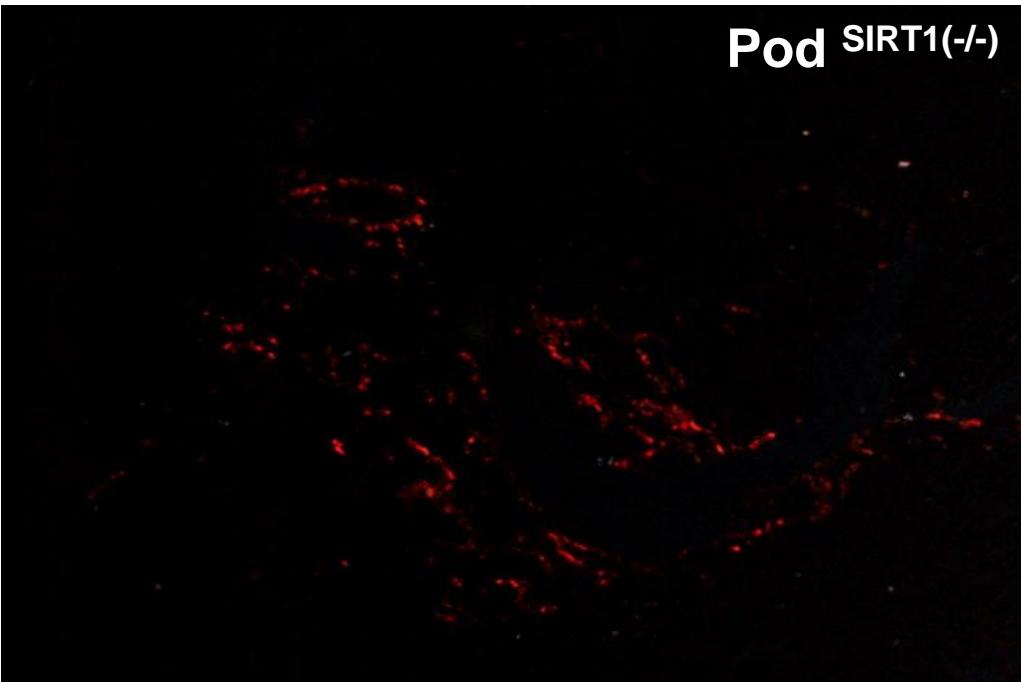

Podocyte SIRT1 Deletion Promotes Albuminuria in Diabetic Mice

Sirius Red Staining in Diabetic Mice with Podocyte SIRT1 deletion

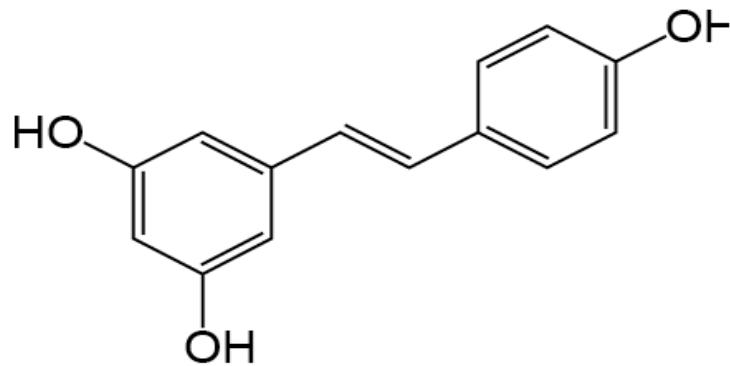

Pod SIRT1(-/-)

Pod SIRT1(+/+)

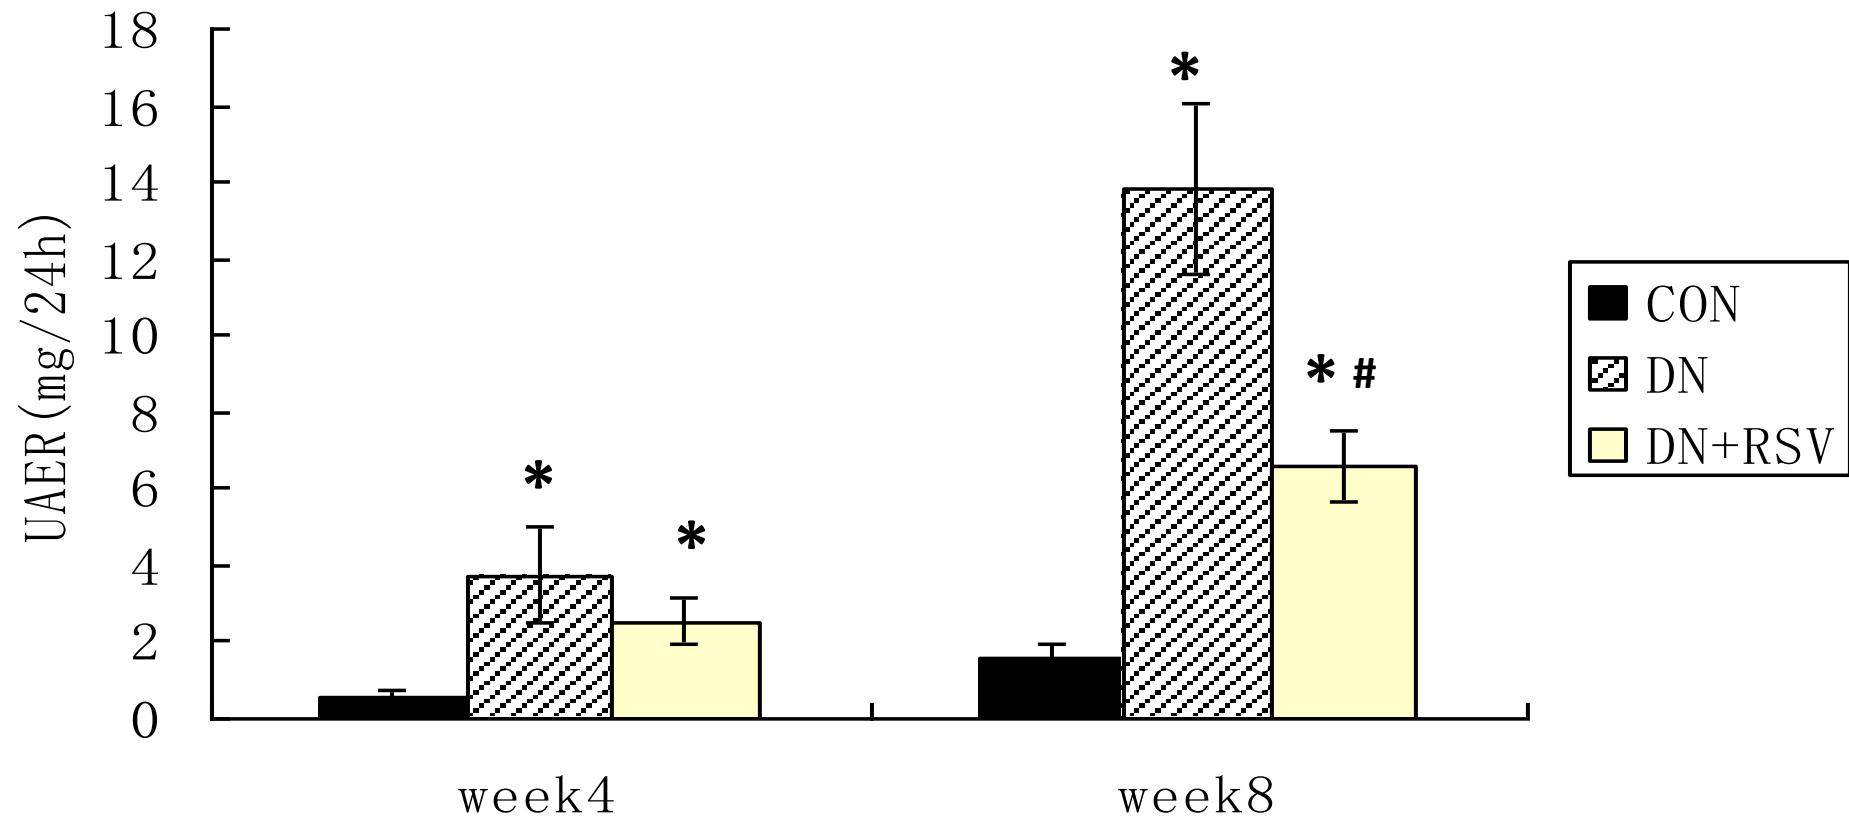

Resveratrol Reduces Urinary Protein Excretion in type 1 Diabetic Rats

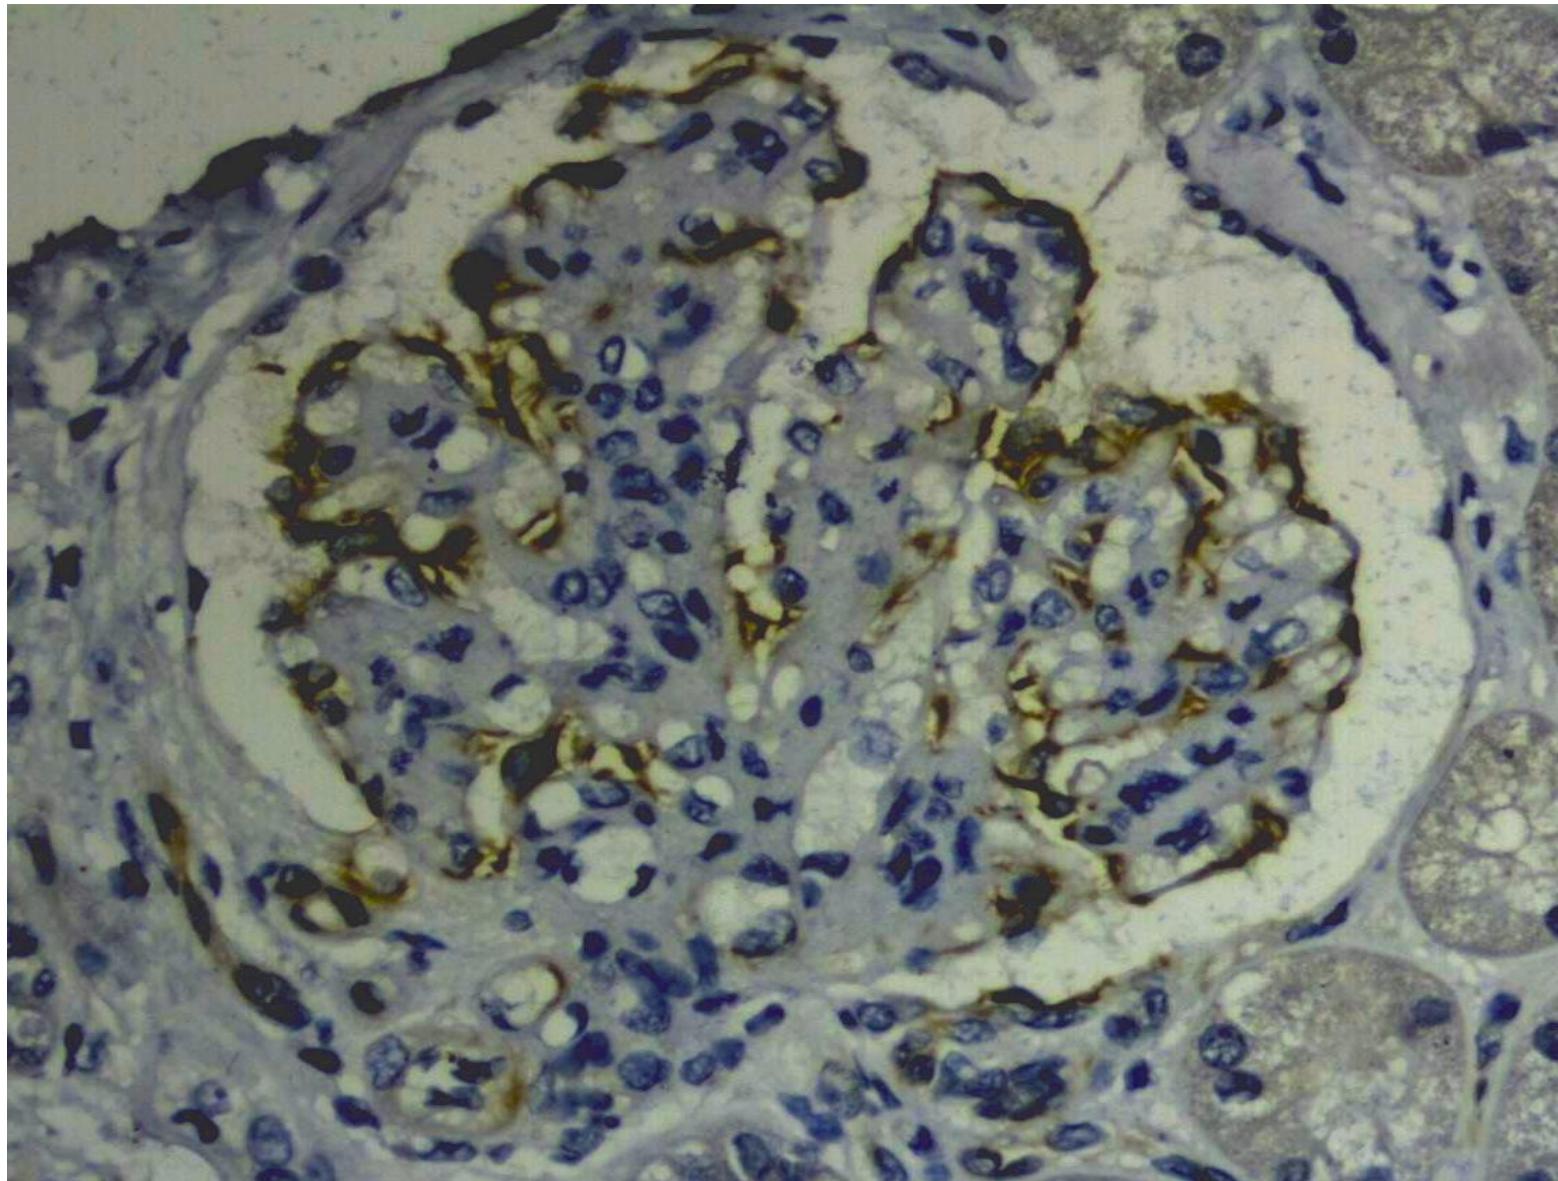

Resveratrol

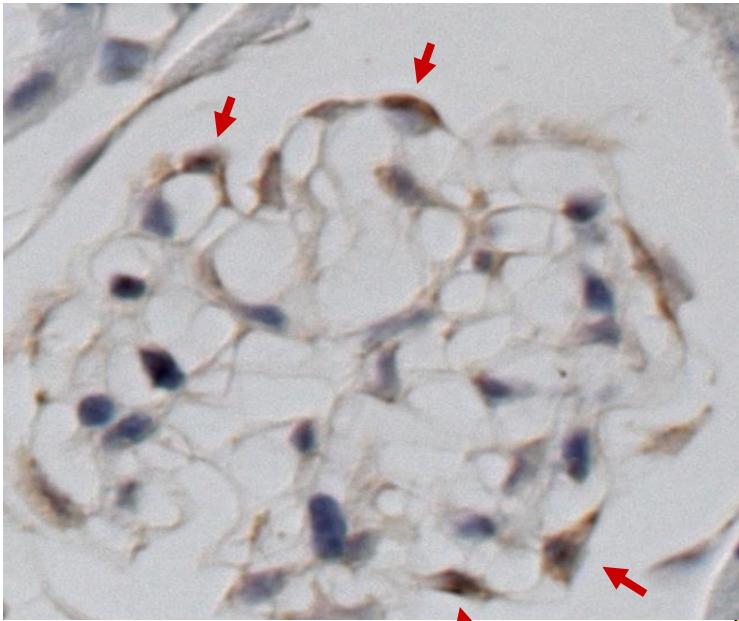

RSV Improves Albuminuria of Diabetic Rats

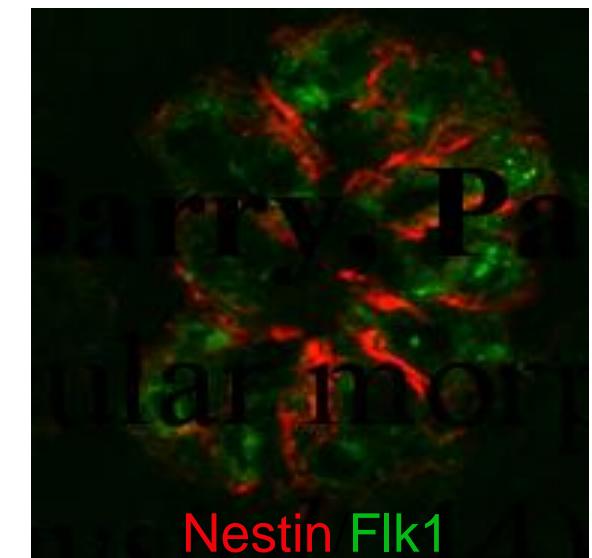

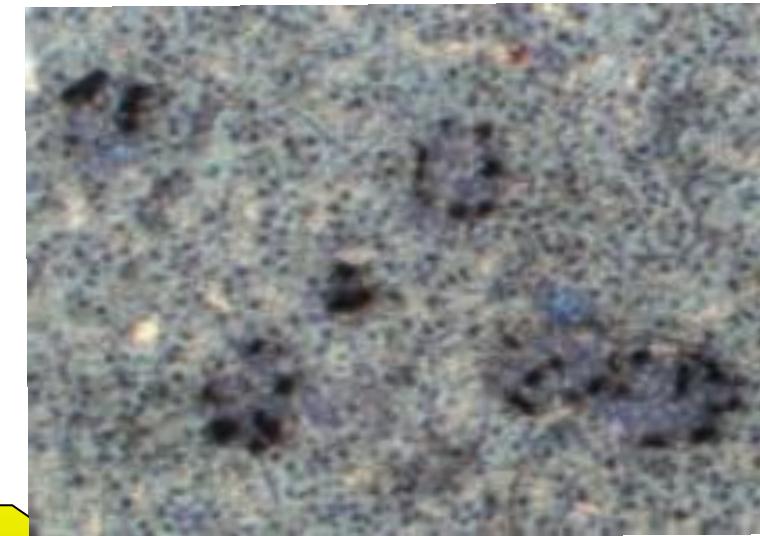

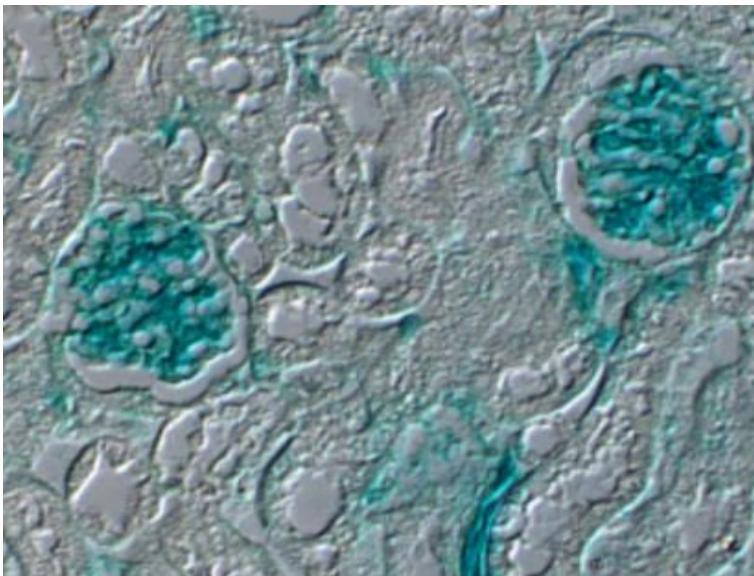

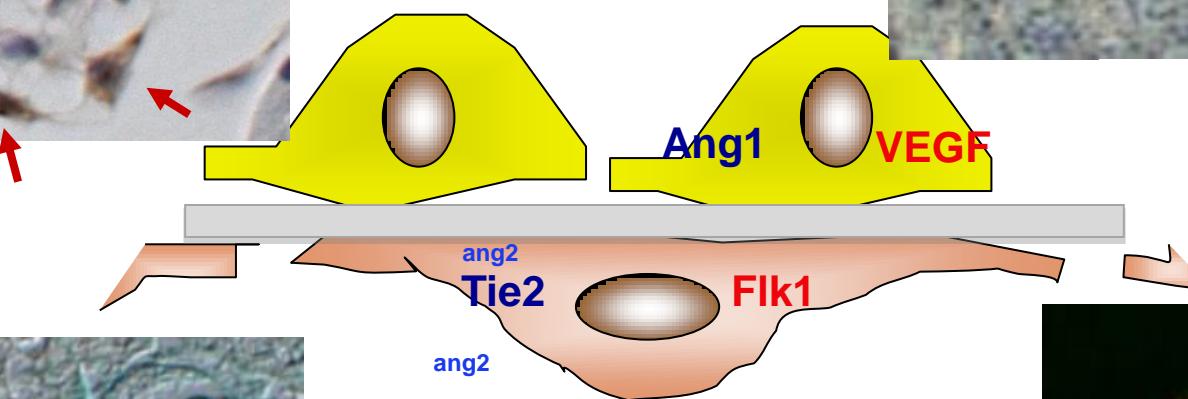

Angiogenesis in Diabetic Glomeruli in Human

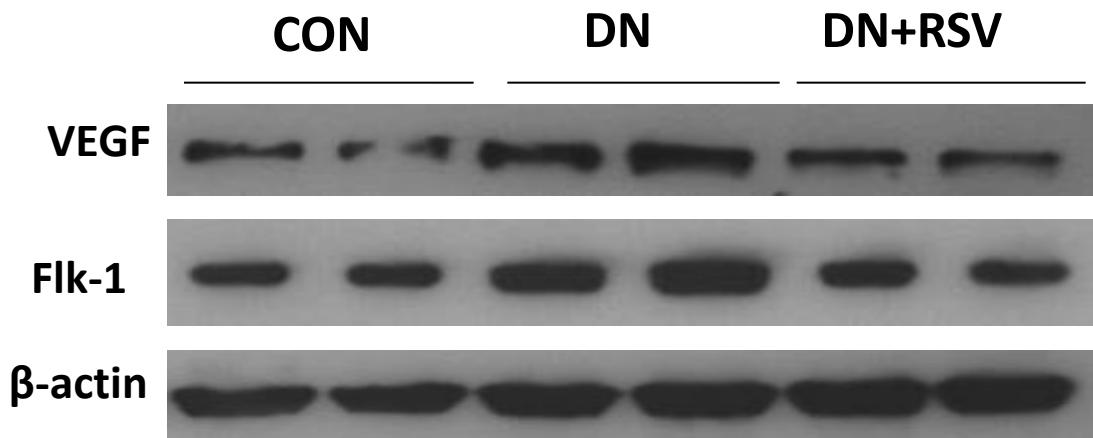

**VEGF/FLK1
Ang1/tie2**

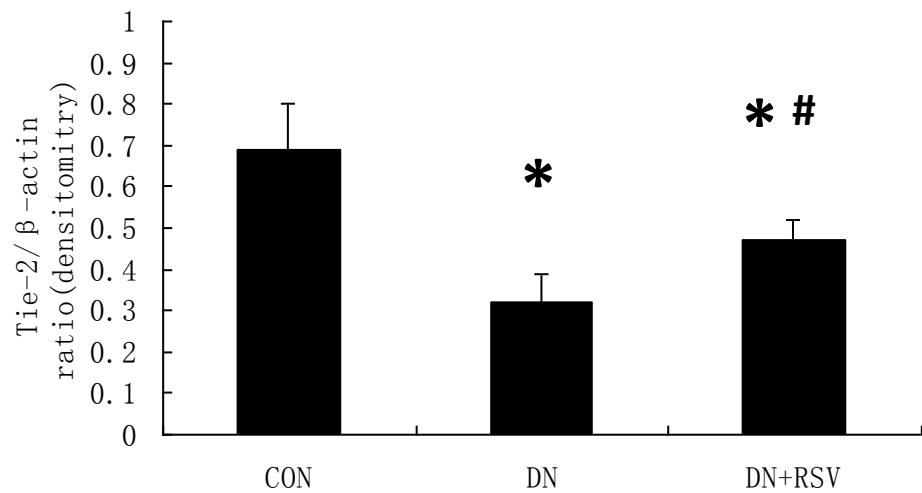

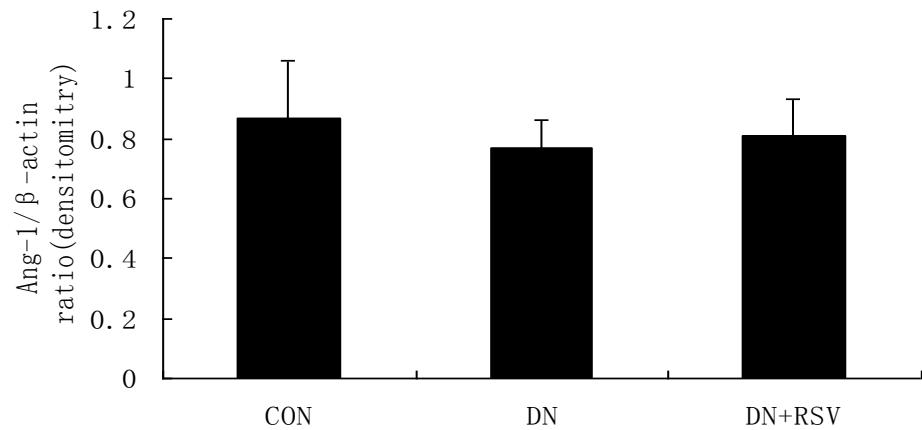

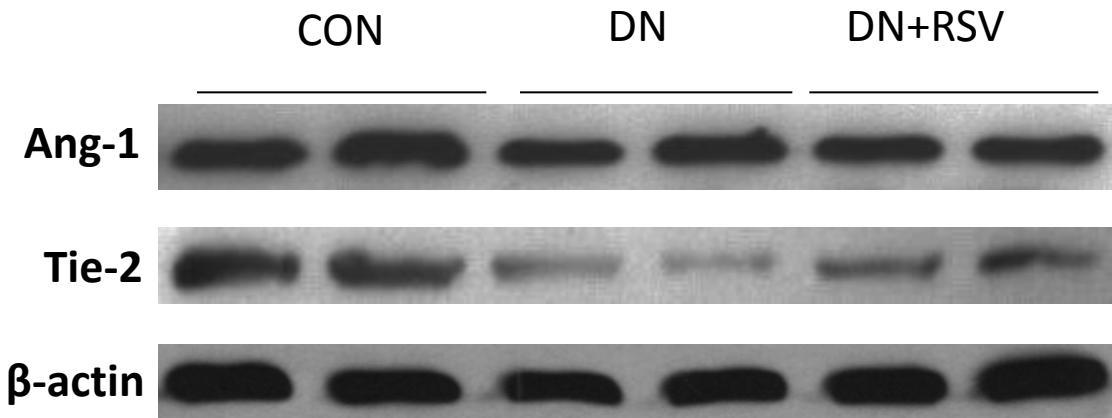

RSV Reduces VEGF and Flk-1 Expression in Diabetic Rats

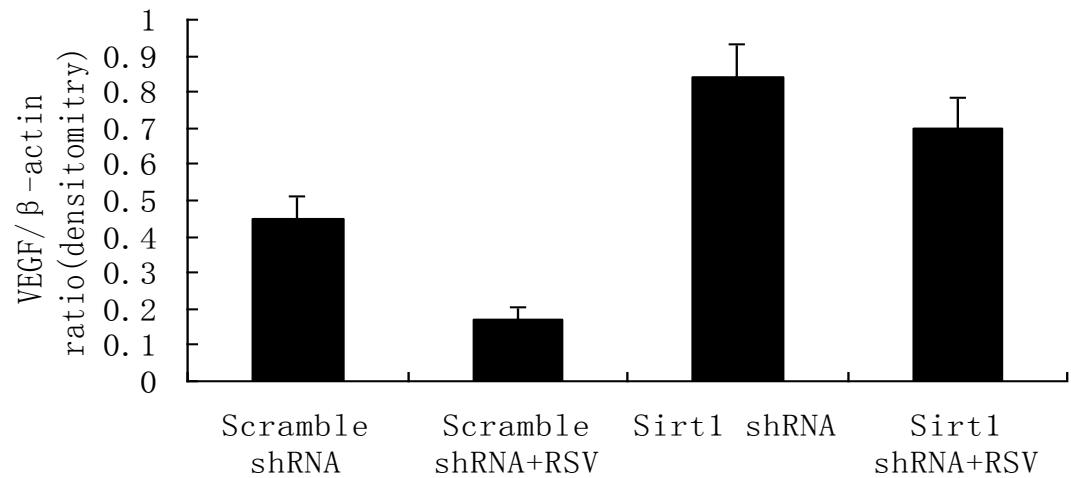

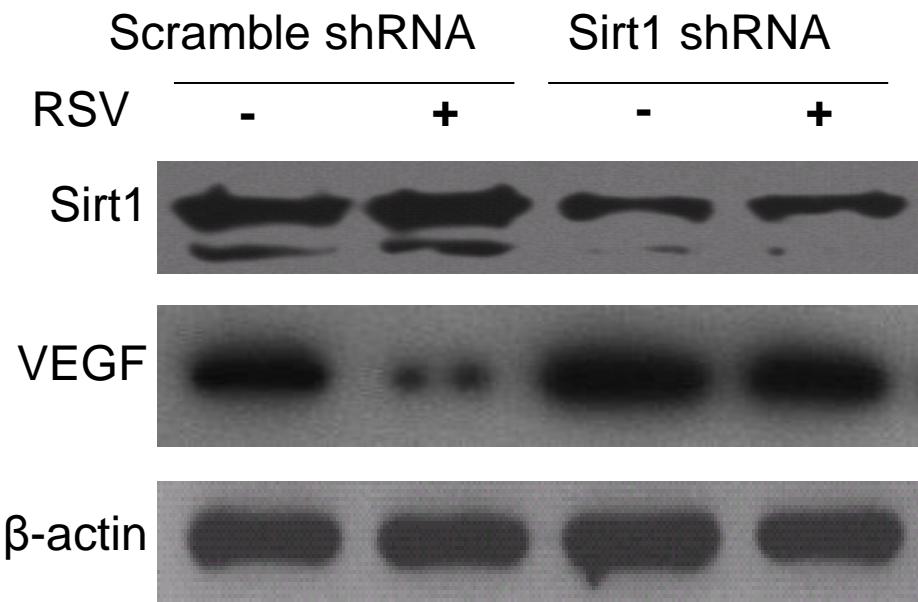

* p<0.05, DN vs CON,
p<0.05, DN+RSV vs DN

RSV Attenuated Tie-2 Inhibition in Diabetic Rats

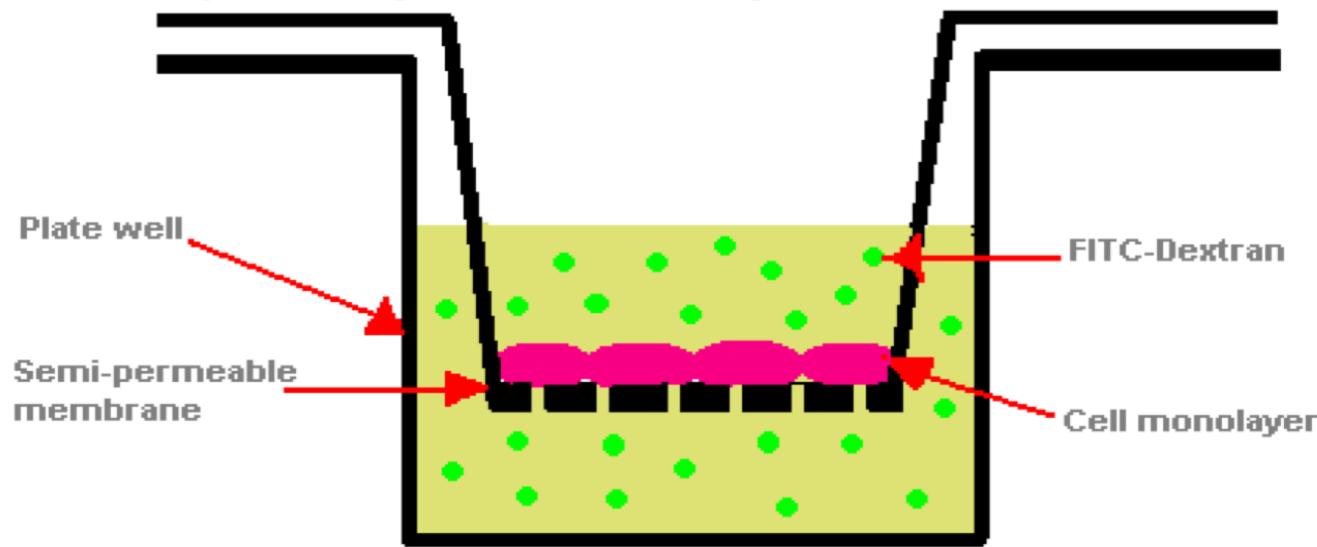

Sirt1 Mediates RSV-induced Downregulation of VEGF Expression

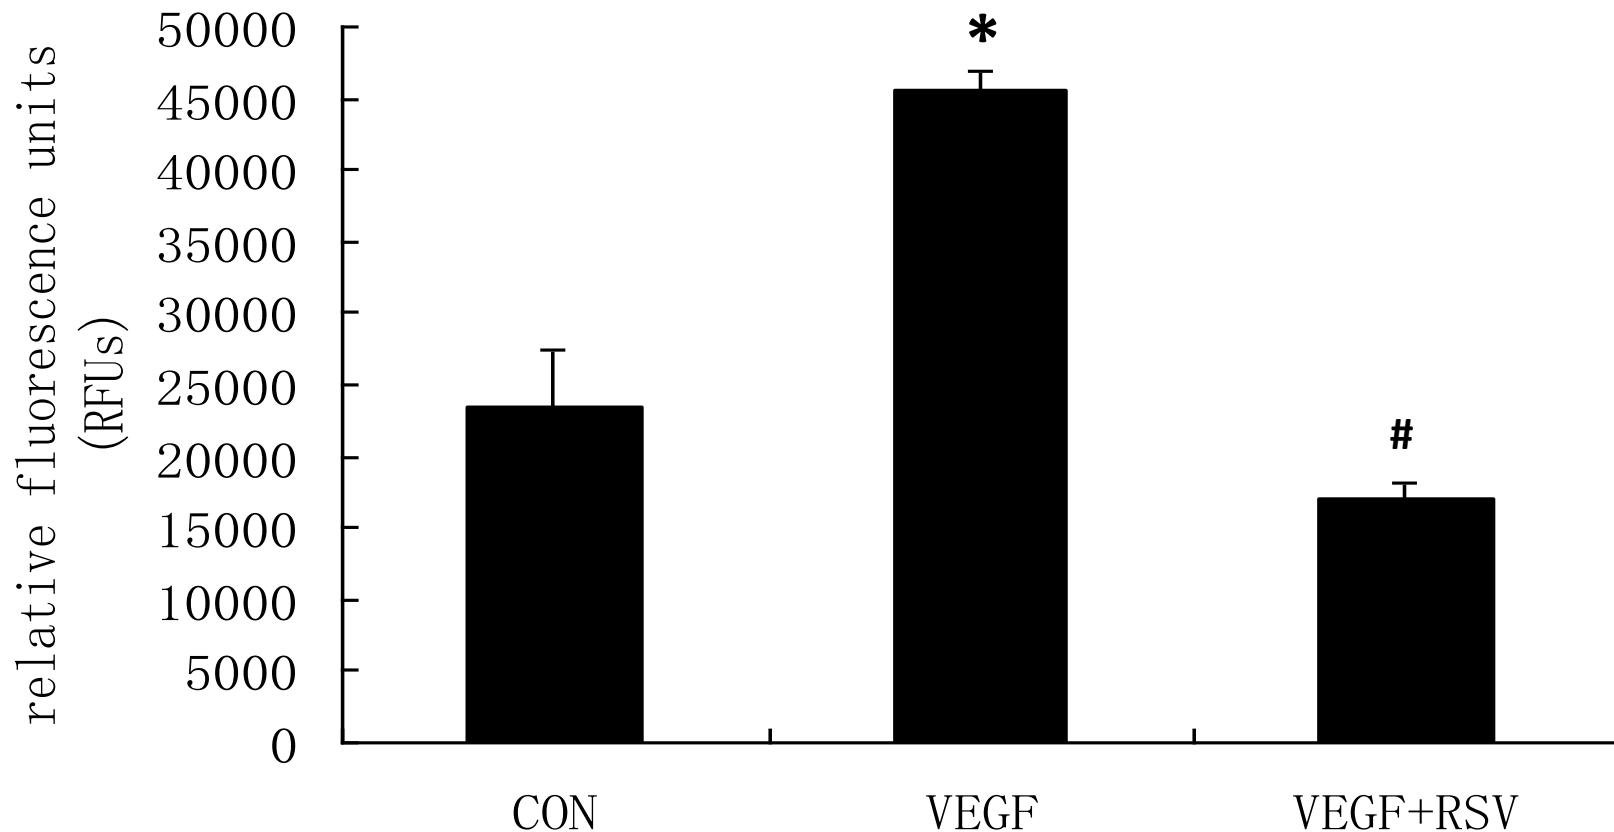

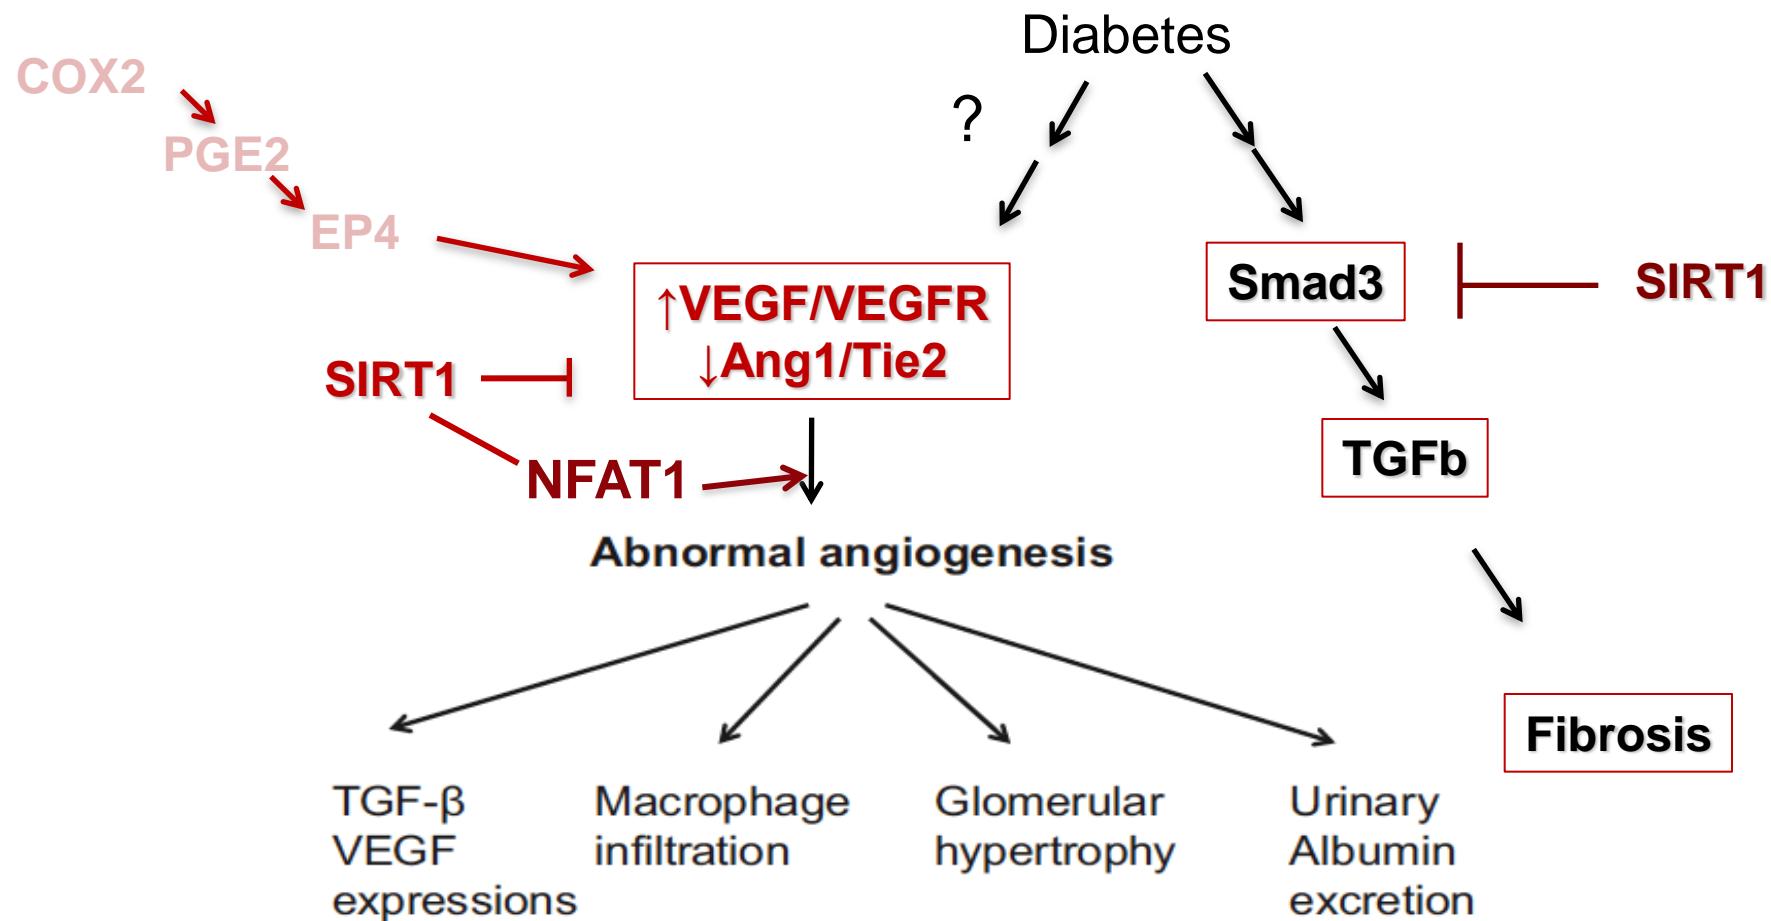

Diabetic kidney :
↑VEGF/VEGFR
↓Ang1/Tie2

**FITC-Dextran permeates the treated cell monolayer into the plate well.
The resulting fluorescence of the plate well is an indicator of the extent
of the permeability for that cell monolayer.**

RSV decreased VEGF-induced hyperpermeability of endothelial cells

How do the popular beverages compare in antioxidant activity?

Antioxidant compounds are found in vegetables, fruits and many natural beverages like tea. Balanced diets are naturally-rich in antioxidants. Enjoy the variety, flavours and health potential in every serving!
